• Motivated and dedicated ASP.NET developer with 3 months of hands-on experience in building and maintaining web applications. Proficient in utilizing ASP.NET framework,C#, HTML, CSS, and JavaScript to create dynamic, user-friendly interfaces and robust backend systems.

• Strong problem-solving skills with a passion for learning and implementing new technologies. Demonstrated ability to work collaboratively in a team environment and effectively communicate technical concepts to non-technical stakeholders. Eager to contribute to innovative projects and grow as a developer in a challenging and dynamic environment.

Work Experience

IT Faculty
Aptech-Karachi
June 2024 to Present

I teach flutter, dart, HTML, CSS3, Bootstrap, JavaScript, ms office, c sharp and .Net core

Web developer, Junior
software house-Karachi
January 2022 to March 2022

Work online on Asp.net project with team members
Portfolio:

https://ihadi.net/

Key Responsibilities:

1. Building Web Applications: Ability to develop dynamic, scalable, and secure web applications using ASP.NET Core with a strong understanding of the MVC (Model-View-Controller) design pattern.

2. Routing and Middleware: Knowledge of configuring and using routing to control how URLs are handled by your application, and creating custom middleware to handle requests and responses.

3. Dependency Injection: Understanding and implementing dependency injection, which is a fundamental part of ASP.NET Core for managing service lifetimes and promoting loose coupling between components.

4. Authentication and Authorization: Ability to implement authentication and authorization using ASP.NET Core Identity or other external providers like OAuth and JWT for secure user management.

5. Entity Framework Core: Proficiency in using Entity Framework Core to interact with databases, perform CRUD (Create, Read, Update, Delete) operations, and manage database migrations.

6. RESTful API Development: Skills in building and consuming RESTful APIs using ASP.NET Core, with proper implementation of HTTP methods (GET, POST, PUT, DELETE) and status codes.

7. Error Handling and Logging: Experience in managing application errors and logging using built-in or third-party libraries such as Serilog or NLog.

8. Client-Side Integration: Familiarity with integrating client-side frameworks like, jQuery with ASP.NET Core for developing single-page applications (SPAs).

9. Configuration Management: Understanding of configuration in ASP.NET Core, including environment-based settings, appsettings.json files, and user secrets.

10. Performance Optimization: Basic knowledge of performance optimization techniques, such as caching, compression, and minimizing HTTP requests to improve web application performance.

Education

Diploma in BS Computer Science
Aptech - Karachi
June 2019 to December 2021

Intermediate in Engineering
science college - Karachi
May 2018 to May 2019

Matric in Computer Science
Educator - Karachi
January 2017 to June 2018

Skills

- Flutter (Less than 1 year)
- Excel (Less than 1 year)
- Word (Less than 1 year)
- Dart (Less than 1 year)
- HTML5, CSS3, Bootstrap and JavaScript (Less than 1 year)
- Dot Net Core and C Sharp (Less than 1 year)
- PowerPoint (Less than 1 year)
